The Green Team

Earth's resources are being used faster than they can be replenished. We continue to leave the planet in a poorer condition for our future generations than what we inherited. Recycling is the cornerstone of global sustainability.

Thanks to the recycling efforts of City of Saginaw employees, as of June 23, 2010 we have avoided the use of:

- 40,880 gallons of water
- 19 cubic yards of landfill space
- 18 barrels of oil
- 99 trees
- 23,360 kilowatts of electricity

Great job City employees. Keep up the good work!
